

D-28 Hand Mechanical Riveter For Blind Rivets

LIGHTWEIGHT

COMPACT

USER FRIENDLY

VERSATILE

D-28 Operation

1. Insert rivet stem into Nosepiece.

2. Insert rivet into work with riveter nosepiece held firmly and squarely against head of rivet.

3. Squeeze the handles to install the rivet. An additional stroke may be necessary depending on the rivet length and the thickness of the material being joined.

The D-28 Riveter is a very compact and easy to use tool that can fit in your back pocket or a tool belt. It's shorter grip allows for easy one handed use.

There is a built-in latch designed to keep the handles closed with no awkward chains or wires. The D-28 comes with nosepieces that are tucked away inside of the handle which allows for convenient access.
