

# UH60 Blackhawk/Seahawk Light String Kit

The UH60 customized Light String Kit (ALLK-60) includes the light strings listed below, storage cases (ALSB-5441 & ALBB-1) and 23 watt Florescent Teflon coated light bulbs. These custom light strings are continuous strands with Lexan light guards and intermittent electrical drops. The electrical drops reduce the number of electrical cords entering the aircraft eliminating tangled cords and trip hazards. Please note that the cords, cases and bulbs can be purchased separately. These customized light strings are designed for both the Army and Navy versions on the UH60 aircraft.
