F187-AR for CherryMax

FSI

is pleased to announce the introduction of its New **SPECIAL PULLING HEAD ROTATING ADAPTERS**. Available for use with all FSI Cordless, Air Hydraulic, and Hand Hydraulic Blind Riveters and Lockbolt tools, these adapters permit the artisan to position the special right angle and offset pulling heads through a complete 360° angle of rotation in either a clockwise or counterclockwise direction. This eliminates the need to loosen the jam nuts on the pulling heads to position the heads to fit the work area need. This helps minimize potential damage to the threads on the pulling head due to inadvertent loosening (unthreading) of the head during the positioning and re-positioning process. Available for use with Cherry Aerospace, Huck, and Olympic style offset and right angle pulling heads, these adapters provide a major improvement in flexibility with negligible changes in adapter profile and weight. For further information contact Mark Herand at 707-935-1170 or e-mail at mherand@fsirivet.com.
