

D-100-RN Combination Riveter/Nutsetter FOR INDUSTRIAL & COMMERCIAL AIRCRAFT & AUTOMOBILE APPLICATIONS

MANUAL OPERATION

D-100
Hand Hydraulic
Nutsetter
Riveter

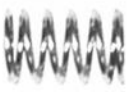

The **D-100 Hand Hydraulic Nutsetter** supplied in the D-100-RN kit provides up to 3,750 lbs of pulling force over a .625" stroke. In the event there are limited access areas where the larger air operated tool will not fit, or if compressed air is unavailable, the sheet metal technician has the capability to perform needed installations.

The D-100 series riveters in the FSI Kits are currently being used by commercial airlines, aerospace vehicle manufacturers, military aviation maintenance organizations, general aviation fixed based operators, private aircraft fleets, and aircraft kit homebuilders. Other versions of the D-100 series riveter and FSI Kits are available for automotive, truck, trailer, bus, marine, industrial sheet metal and general maintenance operations.
